PROJECTS

Credofast(Laravel + Node)

Credofast is a technology-driven application that provides Gold loans in a small market. We provide hassle-free minimal paperless and fast loan processing. We aimed towards giving you maximum control over your loan.

UBI (Laravel 7)

Union Prerna project consists of different modules like Role Clarity, Posting, Target setting, Appraisal, 360 feedback, and Insight.

UBI using prerna tools for Internal operations like Hiring new employees, automatically assign role-based on available places in the bank, role allocation, and based on past performance get an appraisal. Plus higher authority allocates targets to PAN India for their future growth and their performance can be measured in Insight tool based on that tool suggest an area to be focused on.

RupeeCircle(Laravel 5.6 + AngularJs)

RupeeCircle is a peer-to-peer lending platform, a popular alternative to traditional loans and investing options. It has created a marketplace where borrowers' requirements are listed and investors fund those loans with attractive interest rates.

Cinko(Node + Angular 8)

The Cinko, Hotel Management System is a web + Mobile-based application that allows the hotel manager to handle all hotel activities online. This application gives him the power and flexibility to manage the entire system from a single online system. Cinko provides room booking, Hotel reviews, and other necessary hotel management features

SBI Insurance(Node)

SBI Group Loan Insurance has built a 2-way application, Bank-based and User-based. The bank-based application depends upon Bank and with respect to their branches. The User-Based application depends upon User details. SBI is basically building to create Group loan certificate

Niveran : Internal Portal for uploading claim documents and generating reports based on claims accepted rejected for different insurance policies.

PROJECTS

Scanov(Laravel 5.2 + AngularJs)

Scanov app is used to Go Paperless. Users can connect scanov account with intuit QuickBooks and can upload invoices/receipts to the cloud. At the time of upload pdf or jpeg, OCR will read all the content and store this information. At the same time uploaded documents will get stored in the Amazon cloud.

OurVoiceMatters (Laravel 5.2)

OurVoiceMatters.us is USA based Organization. It creates a Petition where the user can sign the petition. There are four types of members as Voter, Business, Media, Political, and four different forms for signing the petition. Voter members can digitally sign and Business, Media, and Political members can Support the petition

E-Commerce (Laravel 5.6)

E-Commerce is a complete shopping website, where users can make a purchase of the product. E-Commerce, where users can pay for the product through the PayPal payment gateway. The Admin can add the product, category, brands, and which can be viewed to the User. Social Login, User can log in using Facebook, google.
